Be Careful Around School Buses

As our children prepare to return to school, keep school bus safety in mind. School bus transportation is safe; in fact buses are safer than cars. Even so, last year, 26 students were killed and another 9,000 were injured in incidents involving school buses. More often than not, these deaths and injuries didn't occur in a crash, but as passengers were entering or exiting the bus.

Remember these safety tips: Have a safe place to wait for your bus, away from traffic and the street; stay away from the bus until it comes to a complete stop and the driver signals you to enter; when being dropped off, exit the bus and walk ten giant steps away from the bus; keep a safe distance between you and the bus; use the handrail to enter and exit the bus; be aware of the street traffic around you as drivers don't always follow rules of the road concerning school buses. For more info call the 6th Area Support Group Safety Office at 421-2752/civ. 0711-729-2752.
